

Ethos SB2 is a high power; direct radiating sub bass enclosure, which is designed to be used with the Ethos B2 and Ethos VA vertical array cabinet. The cabinet employs two 18” cone transducers, each mounted in their own-vented back cavity, while both drivers are also co-aligned into a V shaped front manifold. The Ethos SB2 shares the width and depth of the companion Ethos B2, but differs in height. Two Ethos SB2 cabinets when stacked are the same stack height as three Ethos B2 cabinets, enabling a 7Kw. Bass/Sub block to be created with a frontal area of under 2 SQ/M. Offering high power detailed sub bass response in a relatively compact package; the Ethos SB2 is integral element of the Ethos array system, array for the real world.
